

Multi-Display Unit „Vitrine“

Elegant stand-alone or wall-mounted aluminum case with up to six TFT displays for customer information or advertising.

The new multi display unit „Vitrine“ with up to six displays in one metal case is ideal for customer information or advertising in 24-7 continuous operation.

Wall-mounted or stand-alone, **Vitrine** is the perfect choice for all indoor places where several monitors are needed for displaying information. Due to its easy to use Windows based software „Artista Control Center“ **Vitrine** can be programmed flexibly from any PC. One freeze image or a sequence of freeze images as a slide show can be assigned individually to each display and display duration for each image is arbitrary.

Operation only requires a power socket. The image show is uploaded from an USB stick to **Vitrine**. An Ethernet connection is provided to enable importing slide shows directly via LAN after a future software update.

Easy handling and maintenance-free

After switch-on **Vitrine** automatically plays the last uploaded slide show. A network connection to a server is not necessary. If an USB stick with a slide show is connected, **Vitrine** copies it into an internal flash memory and starts automatically.

Vitrine is solid state and has no moving parts as hard disk drives or fans, is absolutely maintenance-free and does not need any administration. Since no Windows operation system is installed, regular operating system updates and virus protection are superfluous.

With Software „Artista Control Center“ for creating slide shows.

Technical Data

Case *1*2	Aluminum, silver anodised, satin
Displays	Size 12,1“, resolution 800x600, wide viewing angle
Storage capacity	up to 200 images
Display parameter	Freeze image or image duration from 100 ms to 24 hours
Connectors	Power supply, Ethernet, USB
Dimensions *1	800 x 480 x 80 (H x L x D) in mm without base
Weight *1	approx. 50 kg
Operating temperature	0 to 50° C
